

Weatherford®

Be part of our **NEXT GEN Field Engineering (Wireline)** programme! As a university graduate, you will be given the knowledge, tools, and mentorship needed to create a successful career through a variety of talent development programs. We'll make sure to mentor, manage, and develop your career within Weatherford.

This is a full-time, permanent position in which you will be challenged to expand upon what you learned at university and get to work closely with people you can learn from. Our Field Engineers team in Turkey is friendly, open-minded, and ready to take on new challenges.

Responsibilities:

- Test and maintain equipment in the shop and in the field.
- Perform maintenance and repairs on company owned and rental equipment in the field.
- Assist in time, cost, and labour estimates for completion of job assignments.
- Recommend measures to improve methods, performance, and quality to increase efficiency.
- Accurate and thorough completion of job reports in a timely basis.
- Assist in the shop and make deliveries when available.
- Assist Field Service Rep. when needed.
- Perform various other duties and activities as assigned by supervisor within the physical constraints of the job.

Requirements:

- Graduate Engineer, degree within Engineering (preferably: Electrical, Mechanical, Electronical, Petroleum).
- Enthusiasm to learn, eager to develop new skills.
- Strong communication skills (English and Turkish).
- The ability to think logically and work under pressure.
- You will need to enjoy field work as you will travel to different locations.
- Self-motivator, self-starter, ability to work in a team.
